Summary Overview

- Churn Rate: **28.37%** | Retention Rate: **71.63%**
- Revenue Churn Rate: **17.24%**, lower than the customer churn rate, indicating the company is relatively more successful at retaining high-value customers.
- Competitor is the top category driving churn.
- San Diego has the highest total churn and revenue lost among all cities.

Highest-Risk Segments

- Tenure < 1 year : **61.86%**.
- Month-to-Month contract : **51.69%**.
- Offer E : **52.9%** (426 out of 805 users)
- Fiber Optic : **42.18%**.
- Senior Citizen : **42.81%**.
- Satisfaction Score 1- 3 : the majority of churned customers fall into this group.

Financial Insights

- **Month-to-Month Contract:** Has the smallest revenue (\$6.16M), but loses 40.4% of its revenue from churn. This is much higher than One Year (13.9%) and Two Year (3.7%) contracts.
- **Average Monthly Charge:** Churned customers (\$74.44) pay more than customers who stayed (\$61.26). This supports the finding that competitor offers are a major reason for customers leaving.
- **CLTV:** Customers who stayed (\$4,530.19) have a higher CLTV than churned customers (\$4,149.41). This shows that the company is relatively successful at retaining high-value customers, although the difference is only around 8%.
- **Offer E:** Has the highest churn rate but the lowest revenue loss. This may indicate that Offer E is mainly used by lower-value customers who are already more likely to leave.

Recommendations

- Improve the onboarding process during the first 12 months, as customers are most likely to leave during this period, with a churn rate of 61.86%.
- Encourage Month-to-Month customers to switch to annual contracts, as this segment is more financially vulnerable and has lost 40.4% of its revenue.
- Offer Online Security & Tech Support packages to new customers, as these two services are proven to be the most effective in keeping customers.
- Review the Offer E program, as it has a high churn rate despite having a relatively low financial impact.
- Create a special program for Senior Citizens, focusing on easy-to-use services and more personalized support.
- Review Fiber Optic prices and service quality, especially compared to competitors, as competitor offers are one of the main reasons customers leave.
